SEEKING PARTICIPANTS

Research Study on Differences in College Adjustment between Traditional College Students and Student Veterans

My name is Allysia Ramirez and I am a doctoral student in the Clinical Psychology doctoral program at the University of Indianapolis. I am looking for undergraduate college students to participate in a study looking at adjustment to college. The results of this study will provide valuable information in determining potential differences in adjustment between these student groups that may benefit our understanding of their academic, social, and emotional needs.

You may be eligible to participate if you:
- Are a traditional college student
- Or a college student who is serving or has served in any branch of the United States Military for at least 90 days
- Are at least 18-years-old or older
- Currently attend a two or four-year university or college in the United States

If you were a military service member who was dishonorably discharged from service, you are not eligible to participate.

Your participation is voluntary and would involve the completion of a series of online questionnaires regarding your experiences of your adjustment to your college or university setting. These questionnaires should take between 22 to 32 minutes to complete. Your name will not be attached to any information you provide.

If interested in participating in this study, participants may follow this [https://uindy.co1.qualtrics.com/jfe/form/SV_5w1lcAoxo5DdThJH](https://uindy.co1.qualtrics.com/jfe/form/SV_5w1lcAoxo5DdThJH) where they will find an informed consent form that will specify their participant rights and aid in determining their eligibility for the study. If eligible, they will be directed to the online questionnaires for this study. If they elect to, upon their completion of these questionnaires, they may enter a raffle for a $25.00 gift card for their participation in the study. Only one participant will be randomly selected to receive this gift card. Entering this raffle will require your email address, but it will be kept separate from the study survey to maintain anonymity of your survey responses.

If you have any questions about the study, please contact the Primary investigator, Dr. Lisa Elwood, at Elwoodl@uindy.edu or (317) 788-3473, or the co-investigator, Allysia Ramirez, by e-mail at ramireza@uindy.edu (Please keep in mind that e-mail is not a secure form of communication).

This study has been approved by the UIIndy Human Subjects Protections Program (Exempt UIIndy Study #01020; Approval Date: January 19, 2019). For questions about your rights as a research participant, please contact the Office of Human Research Protections Program, University of Indianapolis, Indianapolis, IN 46227, (317) 781-5774, hrpp@uindy.edu.
